

**Name of Project** BU-101 WAC/SAC Filter Re-locate & BU-1101 Water Treatment Addition

**Location** Christina Lake

**Project Summary** Part of our ongoing construction projects for Cenovus at Christina Lake, the BU-101 WAC/SAC filters and the BU-1101 water treatment building are part of the overall water treatment area that treats / conditions raw water in order to create steam which is used in the injection process in order to recover the heavy oil. In this project, Pronghorn provided the complete electrical and instrument installation along with a comprehensive QA/QC package.
