

Name of Project - 1816                      Cenovus - Telephone Lake

Location                                              The project area is in a remote location, primarily within Township 93 and 94, Range 3, W4M.

Project Summary                                      The Telephone Lake reservoir has a layer of groundwater above the oil that's not suitable for human consumption without treatment. In order for the oil recovery process to be efficient, the water must first be removed, through a process called dewatering.
