Name of Project

Tourmaline Columbia

Location

15-36-44-15W5—Northwest of Rocky Mountain House

Project Summary

This project was for the electrical and instrumentation construction requirements for the following buildings at a new gas plant—inlet separator, 2—2000 BBL emulsion produced water tanks, 2—inlet compressors with process coolers, 4—2000 BBBL condensate tanks, 2—Inlet Lube Oil Filter Coalescers, 3 LPG Storage Bullets, overhead recycle compressor, emulsion tank heater building, refrigeration process unit, genset building, 2—refrigeration compressors, MCC/Instrument Air, VRU, LPG Off load pump skid, sales compressor with process cooler, sales filter coalesce, condensate feed drum with condensate exchanger, condensate stabilizer with cooler, de-botanizer, refrigeration accumulator, refrigeration condenser, heat medium, fuel gas scrubber, HP flare KO drum
